demand is very good, but few holders are Bye disposed to sell until after the January interest is paid. There is some difference noticeable in the value of Pain and Paving Bonds, but we do not see the whole country, was as follows: why the former should be preferred. There is actually no difference, or if any, it is in favor of the Paving Bond, as ad-

City Scrip is somewhat irregular. Serip proper would find buyers at Soc, while Ledger Balances are not in demand at over 78c. An active demand is looked for from tax-payers curing the latter part of the month, and brokers are, generally, not at all auxious to sell. County Warrants are steady. Several

small sales, aggregating probably \$3000. occurred last evening at 760 to dealers, but outsiders are unable to buy at less than 77 to 803.

Police Scrip is senree and firm. Buy-

the banks, for the last day or two, have had to send currency to Chicago and Milwankie, and are daily shipping freely to the centers of the pork trade, and to the Southern cities. As this afflux of currency hardly appears to have reached its climax, there is an expectation in some quarters that the movement may Java produce a partial stringency before the close of the year. This anticipation, however, has little effect upon business

composed as it is of men of sil political parties, thus unequivocally declare their opinions on the subject of legalizing gold contracts.

There is but one opinion in regard to the duly of Cougress in the premises, among men who have given this subject thought. To do business with that medium of exchange and measure of value, which is acknowledged the world over to be the best, is uniawful in the United States. For men to keep their accounts and regulate their commencial transactions by the proper standard of value, is without the assuming or projection of law. To attact this proposition is to exhibit the absenciate. law. To state this proposition is to exhibit its absurdity. That large class of business men who

other foreign countries, would do all this business on a gold basis if the laws rendered it practicable. The domestic commerce of the country would be carried on with a coin correspey, rather than the fluctuating standard of debased paper, if the protection of the law were thrown around this method of doing business. If Eastern and Western merchants kept their accounts in coin, and goods and produce were bought and sold for somuch in gold, then specie would be brought into circulation long before resomption takes place. Give business men the choice between a variable and a FURS, DEER SKINS uniform standard of value, and they will lose no time loadepting the latter. Congress should pass a bill legalizing coincontracts without any further delay.

It is now some twenty years since the proprietor first introduced it to the American public, and during that time he has received over three thousand letters from physicians, indorating its as the purest inquer they have ever used in their practice.

It is made from barley of the finest quality, selected with great care from the producets of the amenical with the securce of the aromatic using per-berry of Italy, and is rectified by a peculiar process, which expets from the epirit every acrid particle.

As a means of preventing and correcting the disagreeable and often dangerous effect produced upon the atomach and bowels by a change of water—a visitation to which travelers, new settlers, and all unacclimated persons in the West, the South, and Southwest are peculiarly inbie—the recursions of the control of the kidners, diseases of the bindler, stricture, dyspepsia and general debility, it is recommended most emphatically by the most distinguished members of the medical profession.

It is put up in quart and pint bottles, in the wint the mane of the most signed.
